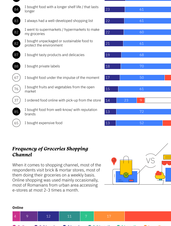
The Impact of COVID-19 on Food Consumption

Food Buying Behavior

Food Shopping Behavior

Packaged food was bought more than in other years, but the share of non-packaged food was an alternative choice to protect the environment.

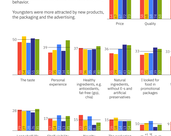
Being careful of their finances reflects also in food purchase, many Romanians from urban areas started to buy more frozen food and canned food. However, well known brands remained among consumer choices, as well as tasty products, these based on an emotional need for pampering.



Frequency of Groceries Shopping Channel

When it comes to shopping channel, most of the respondents visit brick & mortar stores, most of them doing their groceries on a weekly basis. Only 2% declared that they never go shopping, most of Romanians from urban areas accessing e-stores at 2-5 times a month.

Main Food Selection Criteria *Split by age*



Food Consumption Behavior

Healthy/Natural Behavior

During the pandemic, health became the main aspect in people's life. In this respect, they started to be more aware of what they consume and how they consume.

People have chosen natural product, or even organic food and drink that with artificial additives. 8 out of 10 respondents avoided carbonated beverages, replacing them with natural juices.

Food Became my new Hobby

Pandemic helped people in developing many skills and interests, one of them being cooking.

The new context has certainly changed routines, including cooking & eating ones: people tried new recipes and new type of food, consumed more home made desserts to create family pampering moments.

Food buy new Social Life

Seeing each other less often than before, people started to spend more time together, at least in family together. However, many Romanians from urban areas were cautious and organized big meals less than in other years.

6 out of 10 respondents ate in front of the TV, while 5 out of 10 did this in front of the computer.

Junk Food & Sweets made me Feel Better

While sweets began to be consumed more often for energy and to feel better, eating snacks became a way to relax.

Top 12 Type of Food Consumed during Pandemic (More than in other years) *Split by age*

People started to consume more fresh products: fruits and vegetables consumption being higher than meat consumption during the pandemic, across ages.

Coffee consumption increased among people aged 18-34 y.o.

25-34 y.o. consumers had the most food consumption changes.

Bottom 11 Type of Food Consumed during Pandemic (More than in other years) *Split by age*

People are more attentive to what they eat, so they consume less frozen products, semi-prepared products, as well as alcoholic beverages.

Food Behavior Changes during Pandemic

Fresh fruits and vegetables become indispensable products in people's plate. Poultry/ chicken is the main meat people chose to consume during the pandemic.

When it comes to drinks, coffee and tea are the most consumed, while consuming soft & alcoholic beverages (most probably those consuming in going out places).

In the last 12 months, people started to give up mostly to frozen products.
